Why should you choose custom server racks & network cabinets?

Starting with flexible, easily installed, adaptable and pre-configured customized server racks and network cabinets saves you costs, footprint and it increases the performance, efficiency, and reliability of your critical infrastructure. Let's discover the data center custom containment solutions that help you reach your objectives.

How can high-density server racks reduce energy costs?

Direct-to-chip liquid cooling is another innovation that supports high-density server racks. This method can lower energy costs significantly, reducing power usage by up to 90% compared to traditional air-based cooling. By adopting such technologies, you can cut operational costs and promote sustainability in your data center.

How do I choose a power distribution unit for a server rack?

These power distribution units for server racks provide scalable options for high-density environments, optimizing energy usage while delivering reliability and sustainability to meet the needs of modern servers. Pick a PDU that fits your server's power needs. Make sure it can handle more power in the future to avoid problems.

How can high density server racks improve performance?

Many data centers now incorporate energy-efficient hardware, which not only reduces power usage but also enhances performance and reliability. Direct-to-chip liquid cooling is another innovation that supports high-density server racks.

This server rack features a plexi front door and vented rear door with removable airflow plates. Solid side panels are removable and also available in an IR version - internally removable only.

Whether you need server racks for a data center or a wall mount rack enclosure for a wiring closet, Tripp Lite has what you need in our wide inventory of rack enclosures.

Starting with flexible, easily installed, adaptable and pre-configured customized server racks and network cabinets saves you costs, footprint and it increases the performance, efficiency, and ...

# 200kW Industrial Server Rack for Subway Use

This compact 4U CDU is equipped with unique immersion pumps and delivers over 170-200kW heat transfer capacity. It is a perfect solution to provide responsive, high-capacity cooling for high ...

The CHx200 is a rack-based CDU, built for the needs of today's most demanding HPC and enterprise server requirements. Capable of managing 200 kW of heat load in a remarkably small 4U of space, ...

Legrand is a global provider of data center server and network cabinets, providing fully enclosed racks with side panels, front and rear doors, and roofs. We offer the most flexible cabinet and rack ...

These modular racks are a breeze to install, to upgrade, and to maintain. Each one of them incorporates tool-less reversing front and rear doors with U-position numbers and a wide-angle rotation of 130 ...
