Can a containerized Solar System be installed off-grid?

Off-Grid Installer have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.

What is an off-grid container?

The Off Grid Container also transports the solar PV panels and mountings, the only part of the product which has to be assembled at the customer's site. The on-site installation is undertaken by the Off-Grid installer team and after all clients are included in the online remote monitoring service.

What is a "off-grid" Solar System?

Truly "off-grid" solar systems are commonly installed on remote properties or in RVs or boats, where all the solar energy is stored onsite. The majority of residential solar systems, however, are grid-tied and send the excess power they produce to the electric utility.

Are off grid solar containers reliable?

Solar equipment is very reliable but occasionally parts may fail so there is need to monitor and solve any problems. Off Grid Solar container units guarantee security and reliability and allow the engineering team to complete installations in a few days rather than weeks.

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks ...

Think of the Alofi system as a giant power bank for your home. It stores cheap off-peak electricity or surplus solar energy, then releases it when you need it most.

We provide detailed manuals, operation videos, and online remote support. For large clients, we can also provide on-site installation supervision and O& M staff training.

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no ...
