What jobs will grow in the solar industry in 2011?

The Solar Foundation estimates that the largest growth in the solar industry in 2011 will be in occupations in solar installation, including photovoltaic installers and electricians and roofers with experience in solar installation. Map 1. Available solar power energy in the United States

Are solar jobs a 'green economy'?

Clean energy such as solar power is expected to be a key piece of the growing 'green economy,' and jobs in solar power show great potential for new employment opportunities. Jobs are expected to grow in all the major sectors of the solar power industry: manufacturing, project development, construction, operation and maintenance, and installation.

Why is the solar power industry growing?

This growth in the solar power industry is evidenced by the rapid increase in solar capacity over the past several years, leading to the increased demand for skilled workers. Jobs in this industry are located in many states and cover a wide variety of occupations.

Who makes solar power?

Manufacturing workers make the equipment used in solar power generation, such as mirrors and panels. Construction workers build solar power plants. Electricians, plumbers, and solar photovoltaic installers install residential and commercial solar projects.
