---

Buildings were responsible for a significant amount of the country's overall energy consumption; The standards of efficiency were quite low, so the relative benefits for any upgrade were high; Local ...

The country is preparing to install its first battery energy storage system - with a capacity of up to 120 MWh. This is a huge step towards energy system stability, better use of renewables and ...

This project aims to implement a battery energy storage system (BESS) for EPBIH, aimed at enhancing the decarbonisation of the energy sector in Bosnia and Herzegovina.

Bosnia and Herzegovina stands at a pivotal juncture: renewable deployment, especially solar, is racing ahead, and market rules have developed to accommodate storage and aggregation.

Bosnia and Herzegovina adopted a National Environmental Action Plan, which provides action path to address the major environmental issues of the country. In the energy sector the target will be ...

This paper gives a comprehensive analysis of the economic viability of two of the currently most cost-effective electricity storage technologies: pumped hydro storage (PHS) and lithium-ion (Li-ion) when ...

For Banja Luka and surrounding regions, energy storage isn't just about technology - it's about securing reliable power, enabling clean energy growth, and building climate resilience.
