Who is Boston Dynamics?

Boston Dynamics is redefining possibilities with robotics, driven by innovation, agility, and a commitment to transforming industries worldwide. Spot is redefining mobility with precision and adaptability. Atlas is setting the standard for advanced robotics with unparalleled agility.

How can I learn more about Boston Dynamics?

If you're interested in learning more about Boston Dynamics or our solutions, explore success stories and reach out to our experts. Spot is a reliable robotic solution for the energy and natural resources sector. Perform inspections in hazardous environments and capture data remotely.

Why should you choose Boston Dynamics?

Our robots are equipped with advanced mobility, dexterity, and intelligence, enabling automation in unstructured or hard-to-traverse spaces, from industrial plants and construction sites to distribution centers and warehouses. Boston Dynamics' mission is to imagine and create exceptional robots that enrich people's lives.

What services does Boston Dynamics offer?

Boston Dynamics' support and service teams are available with training and resources to jumpstart your journey with Spot and enable ongoing success. Extensive testing in the lab and field has created a robot that you can trust to work day-in and day-out.

Discover Spot, Stretch, Atlas, and Orbit. Capable of navigating the unpredictable environments where people work, our robots can operate when and where they're needed. Our intuitive controls, ...

Atlas, the world's most dynamic humanoid robot, enables Boston Dynamics to push the limits of whole-body mobility and manipulation.

Our designs are ultimately motivated by functionality--to move and balance dynamically in unstructured, unknown, or antagonistic terrain. Today, we combine an established legacy, roots in R& D, and an ...

As a dynamic sensing platform, Spot provides valuable insights into routine operations, site health, or potentially hazardous situations. With Spot, your team can focus on the things that matter most, ...

Boston Dynamics Solar Power

Underground, off-shore, electrified--Spot can reliably handle the extremes of the energy and natural resources sector. Automate sensing, inspection, and data analysis to ensure operational resiliency, ...

A robot dog developed by Boston Dynamics monitors a solar park by walking between the panel rows following a programmed route. It uses its built-in thermal vision system to generate ...

On this episode: Hyundai signals it's to become a major player in the robotics industry through its acquisition of Boston Dynamics for nearly \$1 billion USD, Germany based SINN Power ...

A leading global robotics company, Boston Dynamics builds practical robotics to tackle your toughest automation challenges and change your idea of what robots can do.

Officials spent two months planning a testing program, and then in February of 2022, they kicked off a pilot at the Surry Nuclear Power Station, which is located in Surry County, Virginia and provides ...
