When will a plug-and-play Solar System become legal in Belgium?

To accelerate the adoption of renewable energy, the Belgian government has announced that all plug-and-play solar devices (e.g., balcony PV systems, small mobile batteries) must obtain Synergrid certification (C10/26 standard) to legally connect to the grid starting April 17, 2025.

Will the Belgian model inform the 2026 European Solar charter?

As noted by an EU Energy Commissioner: "The Belgian model could inform the 2026 European Solar Charter, establishing best practices for member states."

How can we promote solar energy adoption in the EU?

Product Optimization: Developing cost-effective, user-friendly plug-and-play solutions to align with policy incentives. -Targeted Marketing: Leveraging government subsidies and regulatory tailwinds to promote solar adoption. Extended Impact: A Coordinated EU Energy Transition
