Our strategy is grounded in three key commitments: to end load-shedding, to alleviate energy poverty, and to optimise energy use across Cape Town.

The City of Cape Town (CoCT) has started construction on a R200-million, 7 MW solar PV plant, located in Atlantis, with the first electricity to be delivered by the end of next year.

Xanthea Limberg, the city's mayoral committee member for energy, said the funds will be directed toward refurbishing the Steenbras power plant, expanding solar PV capacity, and improving ...

Ener-G-Africa (EGA), an African company tackling the challenges of climate change through clean energy, officially launched a new 15MW per annum women-led solar panel assembly plant in Cape ...

With rolling blackouts affecting 200+ days annually [1], South Africa urgently needs solutions like the Cape Town Energy Storage Power Station. This 200MW/800MWh facility - one of Africa's largest ...

Cape Town is set to become the first city in South Africa to own and operate its own solar plant. Construction is now underway on the city's own 7 MW facility, which will have potential to...

City of Cape Town, which is in the process of procuring up to 200 MW of renewable energy from independent power producers (IPPs), expects to initiate a utility-scale battery energy storage ...

A solar-plus-storage project is being planned for the legislative capital of South Africa, as the city looks to move "away from Eskom reliance and towards a load-shedding-free Cape Town", its ...

The City of Cape Town has issued a tender for a battery energy storage system (BESS) with a minimum rated power output of 5 MW and energy storage capacity of 8 MWh.

Cape Town Power signs energy storage project

The City of Cape Town (CoCT) has started construction on a R200 ...

The City of Cape Town will, in the third quarter of this year, release an RFP for 100MW of battery energy storage systems in an effort to bolster energy security.
