Decarbonizing the glass industry would have widespread impact across industries--but first, companies need to learn which levers are feasible and how to scale them.

Seeking Strategic Solutions for Transitioning to Photovoltaics in Glass Manufacturing The product development team of a leading glass manufacturer urgently sought sustainable alternatives ...

This systematic review poses five questions to examine these issues and themes: What alternatives exist to abate the climate effects of glass and thus make the full life cycle of glass more ...

European Glass-Glass Photovoltaic Modules Are Particularly Climate-Friendly In a new study, researchers at the Fraunhofer Institute for Solar Energy Systems ISE have calculated that ...

Do you know glass production has a significant impact on the environment? Learn about the carbon footprint of the glass industry and its effects on the planet.

EC glass can reduce carbon emissions by 35% in new constructions and around 50% in renovation projects⁸⁸. Other studies suggest that the low-emittance (low-E) glass improves the ...

What is low-carbon glass? Given the current environmental concerns, low-carbon glass is a type of glass specifically designed to ...

As part of AGC Glass Europe's strategy and its environmental target for 2030, the carbon footprint is assessed on a yearly basis. Relevant internal data is selected in order to reflect, to a ...

Seeking Strategic Solutions for Transitioning to Photovoltaics in Glass Manufacturing The product development team of a leading glass ...

Carbon emissions from solar glass companies

Additionally, the rising awareness about the environmental benefits of glass, its recyclability, its ability to reduce carbon emissions, save energy consumption, and displace the use ...

What is low-carbon glass? Given the current environmental concerns, low-carbon glass is a type of glass specifically designed to have reduced embodied carbon. Integrating low-carbon glass ...

Explore Saint-Gobain Glass Solarcontrol S.L.'s latest carbon emissions profile, Scope 1, 2, and 3 data, sustainability targets, and how they compare to industry peers using the DitchCarbon Score.
