Incoming Chinese competition is an ominous sign for one of Europe's last clean technology hopes--wind turbine manufacturing. China has already eradicated Europe's solar industry. It also ...

BEIJING, Feb 4 (Reuters) - The European Union's "discriminatory and restrictive measures" against Chinese companies send "a protectionist signal", China's foreign ministry said on Wednesday in ...

China vowed on Wednesday to defend its companies' legitimate rights and interests after the European Union opened an investigation into Chinese wind power company Goldwind Science & ...

The European Commission started this specific investigation in 2024 by looking into several companies in the wind sector active in the bloc, including Goldwind.

A ship loaded with wind turbine parts made by the Goldwind company is seen at Lianyungang port, in China's eastern Jiangsu province. (AFP) China on Wednesday accused the ...

China has voiced serious concerns and strong dissatisfaction over the European Commission's decision to launch an in-depth investigation into a Chinese wind power enterprise ...

China has criticised the European Commission's anti-subsidy probe into Chinese wind turbine maker Goldwind Science & Technology as "targeted" and "discriminatory", warning that such ...

In a recent report published by the Oxford Institute for Energy Studies, we explore whether Chinese wind turbine companies are competitive in Europe and the real risks and benefits of Chinese ...

In 2024 China accounted for more than 70% of new wind-power installations globally, according to Bruegel, a think-tank in Brussels. Lately, however, the market has been growing less ...

China-Europe wind

The European Commission launches an in-depth investigation into Goldwind, a Chinese wind power company operating in Europe: it may have received illegal subsidies.
