Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Did Chinese inverters have unauthorized communications equipment?

Solar Panels Cordon Press. U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, according to a report by Reuters published Wednesday. The document reveals the presence of unauthorized and fraudulent communication devices in several Chinese-made solar power inverters.

Are Chinese solar power inverters Rogue?

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by U.S experts who strip down equipment hooked up to grids to check for security issues, the two people said.

Can Chinese solar power inverters be hacked?

The document reveals the presence of unauthorized and fraudulent communication devices in several Chinese-made solar power inverters. These could introduce unregulated and undocumented remote communication channels into the inverters, through which an attacker could remotely bypass cybersecurity firewalls used by utilities.

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, according to a report by Reuters published Wednesday.

Reuters was unable to determine how many solar power inverters and batteries they have looked at. The rogue

components provide additional, undocumented communication channels ...

Recent investigations have uncovered the presence of undocumented communication devices within Chinese-manufactured solar power inverters and batteries, raising significant ...

Undocumented communication devices have been discovered inside solar inverters and batteries manufactured in China, according to two sources familiar with the matter.

U.S. energy officials are alarmed by the discovery of unauthorized communication devices in Chinese-made power inverters and batteries, crucial for renewable energy infrastructure.

In November, solar power inverters in the U.S. and elsewhere were disabled from China, highlighting the risk of foreign influence over local electricity supplies and causing concern...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

After a news report about undeclared circuitry in Chinese solar components, European experts fear the bloc may be vulnerable to blackmail.

Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a "critical role" in renewable energy infrastructure, Reuters reports. This has ...
