Could hidden communications equipment be found in Chinese-manufactured solar energy parts?

That has created a vulnerability that suddenly feels more real, as Reuters is reporting that experts have discovered hidden communications equipment in various Chinese-manufactured solar energy parts.

Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Are undocumented communication devices hidden in Chinese-made solar inverters?

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

Does China have a grip on energy infrastructure?

NATO added that China's grip on energy infrastructure is deepening. "We must identify strategic dependencies and take steps to reduce them," a NATO official said. With critical infrastructure at stake, governments are being pushed to act before the risk escalates further.

Over the past nine months, undocumented communication devices, including cellular radios, have also been found in some batteries from multiple Chinese suppliers, one of them said. Reuters was...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

Over the past nine months, undocumented communication devices, including cellular radios, have also been found in some batteries from multiple Chinese suppliers, one of them said.

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

China's solar-powered communication cabinets have an uninterrupted power supply of 6 25mwh

Undocumented communication devices have been discovered inside solar inverters and batteries manufactured in China, according to two sources familiar with the matter. These components could ...

In November, solar power inverters in the U.S. and elsewhere were disabled from China, highlighting the risk of foreign influence over local electricity supplies and causing concern among...

In May of 2025, U.S. experts found undocumented communication modules and secret radios embedded in some Chinese-manufactured solar inverters and battery systems.

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a "critical role" in renewable energy infrastructure, Reuters reports. This has ...

Cellular radios and other undocumented devices were found in solar inverters and batteries. The transition to clean energy without sufficient domestic manufacturing options has made ...
