Which solar generator is right for You?

Which generator is right for you depends on how much power you need. The performance of solar generators is measured in watt-hours (Wh). For example, imagine you have a load of 100W (which may be typical of a large fan and a portable refrigerator combined), and your solar generator's capacity is 1,000Wh.

Is the ecoflow Delta Pro A good solar generator?

The EcoFlow Delta Pro is a large portable power station with an output that rivals some gas portable generators. When sold in a bundle with solar panels, like the package with two 220-watt portable panels we tested, it becomes a powerful solar generator.

Can a solar generator be used as a backup power source?

Solar isn't just for rooftops - you can use portable solar products like solar generators as a backup power source if the grid goes down or as a source of electricity for your campsite, RV, or boat. But what is a solar generator exactly? And how does it compare with typical fossil-fuel-powered generators?

Are solar panels a generator?

Solar panels can't act as generators on their own - the electricity they generate needs to be stored somewhere. So, solar generators typically consist of two main products: solar panels and a battery storage system. When you place your solar panels out in the sun, they generate direct current (DC) electricity.
