What is a telecommunications enclosure?

These telecommunications enclosures are constructed with robust materials such as galvanized iron, aluminum, or stainless steel to ensure durability. The market for outdoor telecom cabinets was valued at USD 5.1 billion in 2024 and is projected to reach USD 8.6 billion by 2033.

What is an outdoor telecom enclosure?

Our outdoor telecom enclosures support a wide range of telecommunications and infrastructure needs: Fiber Optic Networks: From compact fiber distribution units to high-capacity data center enclosures like the AP-Data with six slack frames, our cabinets manage dark-fiber volumes with organized cable management and secure slack storage.

Where are outdoor Telecom enclosures made?

Every outdoor telecom enclosure we manufacture is designed, fabricated, and assembled entirely in the USA. Our commitment to American manufacturing means you receive consistent quality, faster lead times, and complete Build America, Buy America (BABA) self-certification documentation with every order.

Why should you choose a telecom shelter?

The lightweight construction of our shelters reduces the need for on-site structure support, resulting in decreased costs for site preparation. Additionally, our unassembled telecom shelters can be easily transported via elevator and assembled directly on the rooftop, eliminating the need for expensive crane rentals.

Whether you choose unassembled or pre-assembled options, our rooftop shelters offer unparalleled cost savings and convenience. The lightweight construction of our shelters reduces the need for on-site ...
