-----

Each month, we collect data on the status and dynamics of the Croatian power system. This quarterly report provides a detailed comparison of key indicators for the second quarter of 2025 ...

Croatia has significant potential for the use of renewable energy sources, including solar energy, wind energy, hydro energy, and geothermal power. 30 percent of energy currently consumed ...

Croatia produces oil and gas but unlike most of its neighbours, it no longer has its own coal reserves. Croatia is somewhat dependent on electricity imports, depending on hydrological conditions.

Why Croatia Demands Robust Outdoor Power Systems? With 1,246 islands, 8 national parks, and a thriving adventure tourism industry, Croatia's outdoor environments require power solutions that ...

Discover how portable 220V outdoor power supplies are revolutionizing energy access in Split's coastal adventures and worksites. Whether you're camping near Biokovo Mountain or hosting an event on ...

Croatian oil and gas company INA and German energy giant E.ON's subsidiary in the Southeastern European country - E.ON Croatia, have signed a power purchase agreement for ...

Croatia increased its electricity imports by a third in June, in spite of its efforts to become as self-sufficient energetically as possible.

At the end of 2022, the total available power of power plants on the territory of the Republic of Croatia was 4,946.8 MW, of which 1,534.6 MW in thermal power plants, 2,203.4 MW in hydropower plants, ...

This surge turned Croatia into a net importer of electricity, with imports totaling 326 GWh, a sharp reversal from the 125 GWh exported in the same period last year.
