What is a solar tile manufacturer?

As a solar tile manufacturer, we offer innovative solutions to meet your solar product needs. Our solar tiles integrate advanced solar cell technology and can be a direct replacement for traditional tiles as part of a building's roof, providing clean, renewable energy for your home.

What are solar roof tiles?

Solar roof tiles (or photovoltaic roof tiles) are a way to seamlessly integrate solar technology into your home without compromising the natural design of your home. It works on the same principle as traditional solar panels. Therefore, solar roof tiles combine the functionality and aesthetics of BIPV, allowing for uniformity of design!

What are thermal solar tiles & hybrid solar tiles?

Thermal solar tiles are created primarily to catch and use solar heat instead of PV panels, which concentrate on generating electrical energy. Hybrid solar tiles are roofing shingles that produce solar energy and mix solar and non-solar tiles to produce a roof that both produces energy and protects against the weather.

How do I choose a solar tile system?

Ensure the solar tile system has been validated and tested by a reputable testing facility to guarantee it is eligible for government incentives like the Energy Company Obligation Scheme. Finally, review the solar tile system's temperature working range to ensure it can endure extremely hot conditions.

Well, solar shingles blend seamlessly with asphalt roofs while generating electricity. These photovoltaic tiles contain silicon cells that convert sunlight into power, just like conventional panels - but without ...
