We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

Discover the best states for solar power production in the country with our February Solar Energy Generation Report. Where does your state rank?

Discover which U.S. state generates the most solar power and how solar capacity varies nationwide.

California, however, leads the way in total solar (both utility- and small-scale) generation, producing over 68,800 GWh of electricity from the sun last year -- that's more than double the ...

Due to the huge potential of solar energy, solar technologies such as solar PV and CSP are promising alternatives for the development of power generation systems in ...

California leads as the top solar state. With over 54 GW of solar installed, enough energy to power over 15 million homes. Texas has the fastest growing solar economy with the largest utility-scale solar and ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

In 2024, 66% of all new electricity generation capacity in the U.S. came from solar. [3] The United States conducted much early research in photovoltaics and concentrated solar power.

Estimated net electricity generation from residential solar photovoltaics in the United States in 2023, by select state (in gigawatt hours)

Domestic solar power generation ranking

on rooftops and increasingly from community solar arrays. In 2024, utility-scale solar power generated 219.8 terawatt-hours (TWh) in the United States. Total solar generation that year, including estimated small-scale photovoltaic generation, was 303.8 TWh. As of the end of 2024, the United States had 239 gigawatts (GW) of installed photovol...

This report summarizes the latest statistics on solar power capacity by state and highlights the top U.S. states in solar power generation.
