We recently presented a webinar which drew on expertise from our Energy Storage research team to explore the unique commercial and ...

Building fully integrated regional grids, long-distance transmission lines and grid-scale storage technologies is imperative for Southeast Asia so that countries can start capitalising on their ...

India's Tata Power, AES and Mitsubishi recently commissioned what the project partners say is India's first, and South Asia's largest, grid-scale battery-based energy storage system (BESS) -- a 10 MW ...

We recently presented a webinar which drew on expertise from our Energy Storage research team to explore the unique commercial and technological opportunities driving demand for ...

Summary: This article explores the cost dynamics of energy storage equipment in East Asia, analyzing regional pricing trends, key applications, and market drivers.

This paper explores the role of BESS in the ASEAN energy landscape, examining current trends, benefits, challenges, and the pathway towards optimising its potential across the region.

This article explores the latest bidding opportunities, market dynamics, and strategic approaches for participating in energy storage tenders across China, Japan, and South Korea.

Discover the current state of energy storage developers in Asia, learn about buying and selling energy storage projects, and find financing options on PF Nexus.

Southeast Asia's battery storage market is set to hit USD 5 Bn by 2030, driven by policy, tech shifts, and energy demands in Vietnam, Philippines & Thailand.

East Asia dedicated energy storage battery

Across the region, countries are moving towards deployment targets, overcoming supply chain hurdles, and unlocking new pathways to scale up utility-scale batteries alongside renewable ...

The Battery Energy Storage Systems (BESS) segment is experiencing rapid growth in the ASEAN energy storage market, driven by declining battery costs and increasing renewable energy ...
