How many electric cars are produced in Cuba?

Between 2020 and 2022, the last year for which figures are available, Cuba-based companies produced more than 23,000 electric vehicles, according to official data. Since then, demand has grown, alongside an economic crisis that has slashed both fuel supply and public transportation.

Are electric cars a godsend for Cuba?

Until recently, Cuba's roads had changed little in the six decades since former leader Fidel Castro's 1959 revolution: the old cars puffing sooty exhaust, rutted pavement, light traffic. Now, electric vehicles are proving a godsend for many in the communist-run nation.

Are electric motorcycles a problem in Cuba?

"Electric motorcycles are solving a lot of problems in Cuba, they are already used for almost everything," explains Omar Cortina, a Cuban hotel worker who recently purchased his first electric vehicle - a lime-green scooter powered by a lithium battery.

Why is the global electric car market growing?

Global electric car market is set to grow significantly driven by stringent emission norms which are forcing automakers to shift towards electric vehicles. Governments across regions are also providing substantial subsidies and tax rebates to promote electric vehicle adoption.
