-----

This issue brief, released by Clean Energy Group and the Clean Energy States Alliance (CESA), outlines best practices and lessons learned for state policymakers and regulators engaged ...

The global energy storage market is projected to grow at a 15.8% CAGR through 2030, yet 42% of project developers cite cost management as their top challenge. This article explores practical ...

The document updates DOE's Energy Storage Grand Challenge Roadmap and reflects significant advances in energy storage technology and deployment since 2020, the agency said.

In January 2022, Governor Hochul announced in her State of the State address the intent to double the state's energy storage target, from 3 to 6 gigawatts by 2030.

Summary: This article explores the critical steps in energy storage project development, industry applications, and emerging trends. Learn how to optimize workflow planning for utility-scale, ...

Using outputs from ReEDS, which optimizes total system cost, this paper investigates the impacts of marginal storage deployment based on competing environmental, financial and grid ...

Through the collection of best practices and understanding the benefit-cost analysis (BCA) of these projects, stakeholders will have a greater sense of how energy efficiency and renewable energy with ...

Explains the key benefits battery energy storage projects offer and how project owners can monetize these benefits (see Benefits of Battery Energy Storage Projects).

Performance-based incentive programs should allow utilities to dispatch enrolled energy storage systems during peak hours, either directly or through a third party. Power export should be allowed, if ...

This report demonstrates what we can do with our industry partners to advance innovative long duration

# Energy Storage Project Reduction Plan

energy storage technologies that will shape our future--from batteries to hydrogen, supercapacitors, ...
