-----

The EU has doubled its solar capacity in the last three years. How have subsidies made this possible, what support is still available, and what still needs to happen?

According to SolarPower Europe 's mid-year analysis, the EU added a substantial volume of solar capacity in the first half of the year, driven by favourable policy frameworks, declining ...

There has been little light relief for European manufacturers of solar panels over the past few years. A glut of cheap Chinese solar panels triggered a flurry of factory closures,...

The new mid-year solar PV EU market analysis from SolarPower Europe reveals that for 2025, the annual market is expected to contract for the first time since 2015, with a projected -1.4% ...

Solar is set to become the largest green energy source globally, the question now for Europe is whether it can revamp its grid fast enough to prevent another dramatic blackout.

With enduring robust imports and potential solar installation bottlenecks, Europe is facing overstocking of solar panels, which could impact panel prices in the market.

Europe's ambitious journey towards green energy is facing a significant challenge, caught in a dilemma between soaring installations driven by cheap Chinese solar panel imports and the ...

Over the past decade, solar energy has become a cornerstone of Europe's transition to clean energy. Thanks to ambitious climate targets, widespread public support, and falling costs, solar ...

BRUSSELS/BERLIN, July 24 (Reuters) - The European Union's expansion of solar energy is on track for its first annual slowdown in more than a decade, industry data showed on Thursday, as some...

Explore how the EU is tackling its surplus of solar panels while striving for climate neutrality by 2050.
