How can glass for Europe help re-build a European solar industry?

Glass for Europe represents almost 90% of flat glass production in the EU and its members can play a key role in re-building a European solar industry in the EU. The main goal of the European Solar PV Industry Alliance is to mobilise finance for European solar PV projects to increase the manufacturing capacity.

What is glass for Europe?

Glass for Europe is officially a member of the European Solar PV Industry Alliance, an initiative launched in December 2022 by the European Commission. The Alliance gathers key players in the value chain of the solar energy industry and aims at scaling up the production of solar PV panels and value chain components in Europe.

What does the EESC say about photovoltaic production in Europe?

The EESC calls upon the Commission and the Parliament to develop new EU policies regarding climate goals and strategic value chains in order to restart the production of photovoltaic cells in Europe and safeguard the production of other strategic glass products and the value chains they belong to (e.g. windscreens for transportation manufacturers).

Why is glass a key component of solar panels?

Glass is an essential component of solar panels and Building Integrated Photovoltaics (BIPV) and it represents between 65% and 95% of solar energy modules weight. Glass for Europe represents almost 90% of flat glass production in the EU and its members can play a key role in re-building a European solar industry in the EU.

The glass sector energy transition will take time and, during the transition, the very high and rising energy costs are creating an extremely challenging situation in the glass sector, currently ...

The Alliance gathers key players in the value chain of the solar energy industry and aims at scaling up the production of solar PV panels and value chain components in Europe. Glass is an ...

Leading European manufacturers have successfully integrated eco-friendly materials into their production processes, demonstrating remarkable results. Companies like SolarTech GmbH in ...

European environmentally friendly solar glass production

The European Solar PV Industry Alliance (ESIA) held its third annual forum on 30 September, uniting industry leaders and policymakers to advance Europe's solar manufacturing and ...

Acteurs de l'Innovation | 16/10/2024 | France - The Isère industrial start-up Rosi Solar will supply AGC Glass Europe with significant volumes of glass from photovoltaic panels, from which it ...

European Glass-Glass Photovoltaic Modules Are Particularly Climate-Friendly In a new study, researchers at the Fraunhofer Institute for Solar Energy Systems ISE have calculated that ...

Glass is an environmentally friendly material that strengthens the European circular economy, supports local employment, and boosts regional economies. This unassuming yet versatile ...

AGC Glass Europe produces, processes and markets flat glass for the construction industry (external glazing and interior decoration), car manufacture and other industrial sectors ...

The members of the initiative EU ProSun Glass are producing some 50% of the solar glass produced in the EU. We are standing for solar glass products with maximum transmittance and ...

AGC Glass Europe, part of the global AGC Group and a global leader in flat glass manufacturing, and ROSI, a frontrunner in the recovery and recycling of high-value raw materials ...
