JSC Wind Power, a renewable energy generation company based in Georgia, is leading the charge in the transition to sustainable power sources with the development of the Ruisi Wind Power Plant in ...

The project achieved stable and efficient operation. After the Ruisi project is connected to the grid, it is expected to provide sufficient daily power support for 200,000 families in Georgia, ...

In a first-of-its-kind study, economic and environmental researchers found the benefits of offshore wind below the surface could boost economic value over time in addition to a cleaner energy...

ATLANTA - Georgia Power asked state energy regulators Thursday to certify 9,900 megawatts of new energy resources that would come from a variety of power-generating projects.

To speed up the development of these renewable energy sources, Georgia could provide more than enough electricity to meet its 2019 electricity demand and over half of what it is projected ...

The clean energy workforce especially will be turbo-charged with an estimated \$180 million of investment in large-scale clean power generation and storage in Georgia between now and 2030.

Issue: The size and topography of Georgia access favors wind power generation, particularly in the southern part of the state.

Georgia Power's 2025 Integrated Resource Plan (IRP) will see the utility aim to install 4GW of new renewable power capacity by 2035.

Georgia's wind energy potential is estimated at 4 TWh (1 500 MW). The average wind speed fluctuates from 2.5 metres per second (m/s) to 9 m/s. The most favourable places for wind farms are being ...

Georgia is developing wind power generation systems

Atlanta, GA - Recently, the Georgia Public Service Commission unanimously approved Georgia Power's 2025 Integrated Resource Plan (IRP), marking a significant step toward enabling ...
