Australia's clean energy transition has reached an important milestone. Five ARENA-funded large-scale battery storage system (BESS) projects, equipped with grid-forming (GFM) ...

A Sydney REZ would create cheaper, cleaner and more reliable energy and provide greater access to affordable battery storage and solar options. New renewable energy models are ...

New South Wales electricity distributor Ausgrid is proposing two, 200 MW / 400 MWh battery energy storage systems to be located in the north coast regional city of Newcastle, and ...

UNSW targets 1,000GWh of energy storage in Australia by 2050, ensuring a resilient, sustainable energy system for a healthy future. View our storage technologies.

The Minns Labor Government is backing the largest rollout of big batteries in NSW history. The NSW Government has awarded contracts for six new long-duration battery projects to ...

The Maryvale Solar & Energy Storage System will support a reliable renewable energy by enhancing grid stability and efficiency. The system will offer dispatchable renewable energy by ...

Summary: As Australia accelerates its transition to clean energy, Sydney is emerging as a hub for integrated wind, solar, and storage projects. This article explores the planning strategies, ...

Electricity distributor Ausgrid plans to build \$423 million worth of grid-scale battery systems across two NSW sites, capable of powering 54,000 homes. The state significant ...

The Iberdrola Group is making progress in its drive for electrification in Australia with two new energy storage milestones in the state of New South Wales. The company has been awarded a ...

Battery energy storage systems (BESS) equipped with grid-forming inverters have emerged as essential components for maintaining system stability in Australia's National Electricity ...
