Stop guessing. Use our 2026 visual calculator to find exactly how many solar panels you need based on your electric bill, roof size, and 400W+ panel efficiency.

Calculate how many solar panels you need based on your electricity consumption and location.

We estimate a typical home needs between 16 and 23 solar panels to cover 100% of its electricity usage.

How many solar panels do I need? Use our 2025 calculator to size your system by home size, kWh usage, and location. Get panel count, roof space, and kW--free from SolarTech.

How many solar panels do I need? Whether you want to help our planet or just save some money, the solar panel calculator might be just the tool you want to use. It's created to help you find the perfect ...

For example, using 300-watt solar panels as a baseline, to reach a cumulative capacity of 20 kW, one would divide 20,000 watts by the power rating of each individual panel. This brings forth ...

For a 20kW solar system, you would need either 200 100-watt solar panels, 100 200-watt solar panels, 68 300-watt solar panels, or 50 400-watt solar panels. This is just how easy it is.

While it varies from home to home, US households typically need between 10 and 20 solar panels to fully offset how much electricity they use throughout the year. The goal of most solar projects is to ...

If you consume 20kwh a day, you need a 5kw solar system or about 13 x 400 watt solar panels. To calculate, multiply your hourly wattage usage by the number of peak sun hours available.

A 20kW Solar system is usually paired with 55 to 60 Solar panels (depending on the wattage of the Solar panels offered; you only need 55 of the 370w Solar panels to get 20kW) and ...
