Where do electricity companies buy electricity in Europe?

Most electricity companies in Europe buy electricity on a common market place, such as Nord Pool. All power plants that produce electricity and electricity companies that supply electricity to homes and businesses meet there. Based on supply and demand, prices are set for each hour and each area, one day in advance.

What determines the price of electricity in Europe?

Supply and demand determine the price of electricity in Europe. If there is a high production of electricity from power plants and demand is low, the price will fall. If, on the other hand, the production of electricity is small and demand is high, prices will increase.

How much does a kWh cost in Europe?

Northern European countries like Sweden and Denmark maintain relatively low average prices around 0.04-0.05 EUR/kWh, with some sub-regions dipping even lower. Central and Western European countries such as Austria, Belgium, Germany, and the Czech Republic report moderate prices near 0.07-0.08 EUR/kWh.

How much does electricity cost in Europe 2025?

On September 17, 2025, electricity prices across Europe show notable regional variations. Italy Sicily records the highest price at 0.12 EUR/kWh, reflecting a premium compared to other regions within Italy, where prices consistently hover around 0.11 EUR/kWh.
