-----

Solar energy has become increasingly important in the global push for renewable energy sources. This article aims to explore the relevance and significance of solar energy specifically for ...

This Article combines data on wind and solar endowments, reservation characteristics and utility-scale renewable energy projects to offer three insights.

Native American lands account for around 2% of the United States land mass but hold more than 5% of the nation's solar potential. Tribes face barriers to installing solar, however. Before ...

While many methods and technologies exist for accomplishing this, solar photovoltaics (PV) are the most common solar energy system employed today. Since 2010, deployment of these systems has ...

Thanks to the Inflation Reduction Act of 2022, the tribe can get tax subsidies of up to 30% for solar and wind farms, as well as grant programmes for electrification, climate resiliency and...

Many Tribes are actively seeking to engage in solar development; a review of 35 Tribal strategic energy plans in 2019 revealed that 32 of 35 Tribes were exploring solar options for their communities. Many ...

Could renewable energy development on American Indian Reservations alleviate poverty? This Article combines data on wind and solar endowments, reservation characteristics, and ...

A WEEL is a short-term lease that authorizes possession of Indian land for the purpose of installing, operating, and maintaining instrumentation, and associated infrastructure, such as meteorological ...

Native Renewables, an off-grid solar power nonprofit that Johns led before joining DOE, has calculated that many families in the Navajo Nation pay between \$ 150 and \$ 700 per month on ...

To increase understanding on how renewable energy can better support Native sovereignty, this paper

provides a systematic literature review of 74 articles published between 2003 ...
