---

A 10-million-kilowatt-level wind power photovoltaic base construction plan focusing on deserts and Gobi areas in Alshaa League, in North China's Inner Mongolia autonomous region, has been ...

Once defined by arid wastelands and ecological degradation, the Kubuqi and Ulan Buh deserts in Inner Mongolia are now home to vast expanses of solar panels -- a transformation that's ...

This marks the first project among Inner Mongolia's four large-scale wind and solar energy bases in desert areas to achieve a combined 2 GW grid connection. It is also the first project ...

The installed new energy capacity, which includes wind power and solar energy, in north China's coal-rich Inner Mongolia Autonomous Region has surpassed 120 million kilowatts, exceeding ...

HOHHOT, Jan. 16 -- Deep in the Kubuqi desert in north China's Inner Mongolia Autonomous Region, rows of blue solar panels glisten under the winter sun, converting sunlight into ...

The Inner Mongolia autonomous region is leveraging its abundant wind and solar power potential to revolutionize its energy landscape, transforming itself into a hub for clean, sustainable power ...

An aerial drone photo taken on June 7, 2025 shows a photovoltaic project in Kubuqi Desert in north China's Inner Mongolia Autonomous Region.

The 3-million-kilowatt photovoltaic power station project in the Ordos coal mining subsidence area of Inner Mongolia, constructed by the CHN Energy Investment Group's Inner ...

The Inner Mongolia wind-solar-hydrogen project stands as a landmark initiative in China's renewable energy sector, demonstrating the country's dedication to developing integrated energy ...

## Inner Mongolia photovoltaic panels blown over by wind

Inner Mongolia has launched a groundbreaking wind-solar power cluster in the Kubuqi Desert, a significant milestone for China's renewable energy efforts. Developed by the China Three ...
