Is Electric Ireland sourced from renewable generation?

* Electric Ireland guarantees that the electricity supplied to you under this price plan is sourced from renewable generation, in accordance with the Commission for Regulation of Utilities Green Source Product Verification process. Prices valid as of 1st May 2023 and subject to change.

Will Ireland achieve 80% of its electricity from renewables in 2024?

In 2024, the country's focus on sustainable energy sources is stronger than ever, with ambitious goals to achieve 80% of its electricity from renewables by 2030. This article delves into Ireland's progress, the challenges it faces, and the exciting future that lies ahead as it transitions to greener energy.

Why is renewable electricity important in Ireland?

Renewable electricity plays a crucial role in Ireland's efforts to combat climate change. Under the Climate Action Plan 2023 (CAP23), Government has set an ambitious target of having an 80% share of electricity generation capacity coming from renewable sources by 2030 to create a more sustainable and resilient energy system for the future.

Can Irish businesses access 100% renewable electricity plans?

Irish businesses can access 100% renewable electricity plans. But not all "green energy" is equal. This guide explains how renewable electricity is sourced, how to avoid greenwashing, and which suppliers offer fully renewable fuel mixes - based on the CRU's 2023 Fuel Mix and CO2 Emissions Report.

With energy prices remaining unpredictable and climate concerns growing more urgent, 2025 is shaping up to be a pivotal year for homeowners in Ireland considering a switch to renewable ...

Irish businesses can easily access 100% renewable electricity plans but not all "green energy" is equal. This guide explains how renewable electricity is sourced, how to avoid greenwashing, and which ...

In 2023, 40.7% of Ireland's electricity supply came from renewable energy, up from 38.6% in 2022. Just over a third (33.7%) of our electricity came from wind in 2023.

To support decision makers, the report explores how Ireland's electricity supply could expand to meet rising demand driven by the electrification of heat and transport, as well as growth in ...

Ireland green electricity

We are committed to making it as easy as possible for our customers to make changes for a brighter energy future and switching to our Green Electricity price plan is a simple way to cut your carbon ...

Find out about renewable energy suppliers in Ireland and how you can switch to reduce your carbon footprint.

Under the original 2009 Renewable Energy Directive Ireland had set a target of producing 16% of all its energy needs from renewable energy sources by 2020 but that has been updated by a second ...

Ireland continues to lead globally in wind energy generation and the integration of renewable electricity onto the grid. In 2023, wind energy contributed 33.7% of Ireland's electricity ...

Ireland's electricity mix includes 39% Gas, 32% Wind and 4% Solar. Low-carbon generation reached a record high in 2025.

Ireland has been at the forefront of renewable energy development in Europe, positioning itself as a leader in the green revolution. In 2024, the country's focus on sustainable energy sources ...
