Ireland's energy storage could increase eightfold by 2035, according to a new report by Energy Storage Ireland. It states that battery storage has the potential to provide secure,...

Energy Storage Ireland urges EirGrid to deliver Ireland's 500 MW storage target by 2030, boosting renewable energy, lowering electricity costs, and improving energy security.

Ireland stands on the brink of an energy storage revolution, as highlighted by a new report from Energy Storage Ireland. The report reveals that the nation's battery storage could expand ...

Developers have installed batteries in Ireland capable of storing up to 400 megawatts (MW) of electricity, equivalent to an average power station, but they are used only as a backstop to ...

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery ...

Ireland - A Game Changer for Long Duration Energy Storage? This is the first electricity storage policy published in Ireland. The Irish Government's Climate Action Plan 2021 set out the need for an energy ...

We find that battery energy storage can become one of the cornerstones of the energy storage portfolio in Ireland and also one of the few options which can enable the Irish electricity ...

Energy storage has the opposite problem to the wind industry where planning is an obstacle but the route to market is there. There is just under a gigawatt of battery storage on the grid ...

EirGrid, the transmission system operator (TSO) for the Republic of Ireland, has launched a consultation outlining how it will procure its first long-duration energy storage (LDES) capacity.

New wholesale electricity market rules have been introduced in Ireland, designed to allow battery storage

assets to participate directly.
