How much does it cost to install solar panels?

The up-front cost to install solar panels has fallen significantly over the years, but it isn't cheap. The average U.S. homeowner requires an 11-kilowatt solar panel system to cover their electricity usage. For a system that size, you can expect to spend just over \$22,000 in 2024, after federal tax credits.

How much does a rooftop solar system cost?

Mounting system: This is what holds rooftop solar panels in place. Costs vary depending on the type of solar installation, but it generally costs between 7 and 20 cents per watt. Electrical wiring and hardware: This includes the wiring, switches and circuit breakers required to connect the solar panel system to your home's electrical system.

How much does a 6 kW solar panel installation cost?

The average 6-kW residential solar panel installation is \$17,852 before incentives. Learn about cost factors, financing options, tax breaks and more.

How much does a solar system cost?

The solar industry doesn't have a standard pricing structure, so the cost to the customer is based on their energy consumption. The cost of a solar system installation can vary widely when you compare the efficiency rate of the solar panels and other installation expenses. The best solar panels can set you back anywhere from \$15,000 to \$50,000.
