Jordan Energy was founded on the belief that solar energy can empower progress in the world. Solar reduces operational costs and increases energy independence for our customers.

Therefore, the provision of reliable and cheap energy supply will play a vital role in Jordan's economic growth. Electricity demand is growing rapidly, and the Jordanian government has ...

Natural gas is increasingly being used to fulfill the country's domestic energy needs, especially with regard to electricity generation. Jordan was estimated to have only modest natural gas reserves (about 6 billion cubic meters in 2002), but new estimates suggest a much higher total. In 2003 the country produced and consumed an estimated 390 million cubic meters of natural gas. The primary source is located in t...
