How much does it cost to charge an electric car in Kyiv?

Thus, the cost of charging an electric car in Kyiv largely depends on the operator, type of station and tariff conditions, which can vary from UAH 5 to 18 per kW. Choosing the best operator depends on your needs for charging speed, ease of access to stations, and your budget.

How much does an EV cost per km?

Let's say our EV averages a conservative 4 km/kWh. Knowing that one kWh of electricity costs \$0.14, and that energy has helped us travel 4 km, we simply need to divide \$0.14 by 4. In this example, it shows our cost per km was \$0.035, or around four cents.

How much does a private electric vehicle cost in Israel?

The price of a private electric vehicle in Israel, specifically a minivan that can carry seven people from the brand, is about NIS 200,000. It is currently the only such electric vehicle in the market, although the potential of this market niche is not clear.

How much does Kyivenergo charge?

The cost of charging at Kyivenergo stations largely depends on the type of station (fast or slow) and the time of day. Tariff: At fast charging stations, Kyivenergo's tariff can be around 13 UAH per kW, and at slow charging stations, between 6 and 8 UAH per kW. Prices may vary depending on the time of day and tariff conditions.
