The IDA has supported approximately 254MW of battery storage capacity in New York City, generating more than \$400 million of private investment and supporting progress toward the ...

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

An estimated 650 gigawatts (GW) (or 1,877 gigawatt-hours) of new energy storage capacity is expected to be added globally from 2023 to 2030, which would result in the size of global ...

In 2023, battery storage continued to be the fastest growing energy storage technology, with increased investment and policy attention. By the end of 2023, 43 jurisdictions had in place policies for energy ...

The plan outlined 21 key measures, including scaling up energy storage applications in power generation and grid infrastructure, accelerating technological innovation, and improving ...

This transformative effort, formerly known as the New Jersey Storage Incentive Program (NJ SIP), is designed to significantly expand the amount of grid-scale energy storage capacity in New ...

China has published a national plan to promote large-scale energy storage facilities, encouraging investment and broader participation in the electricity market.

Energy storage is emerging as an asset class "hedge" against the volatility resulting from decarbonising our power systems. However, investors must consider factors such as technological disruption, ...

LPO can finance short and long duration energy storage projects to increase flexibility, stability, resilience, and reliability on a renewables-heavy grid.

Large-scale energy storage project investment plan

By the Inflation Reduction Act's (IRA) first-year anniversary in August 2023, investors had planned at least US\$122 billion of investment in clean energy-generation projects and more than US\$110 billion ...
