Where in Italy will a new battery energy storage system be built?

The largest project, a 160 MW facility, will be built in the municipality of Tuscania. Italy's Ministry of the Environment and Energy Security (Mase) has issued final approvals for five new battery energy storage system (BESS) projects, paving the way for 361 MW of new capacity to be added to the nation's grid.

Which countries have approved battery storage projects in Italy?

Data Protection Policy Italy's environment and energy ministry has approved six utility-scale battery storage projects in Lazio, Campania, Basilicata and Puglia.

What projects are being built in Italy?

A 54.4 MW BESS in Santeramo in Colle (Bari, Apulia - Southeastern Italy), awarded to Jupiter Srl. The 50 MW "Stornara" BESS project in Stornara (Foggia, Apulia - Southeastern Italy), awarded to Atlas Storage 5 Srl. The 25 MW "Malone" BESS project in Ceprano (Frosinone, Lazio - Central Italy), awarded to GreenStore 4 Srl.

How is Italy transforming its energy system?

Italy, like much of Europe, is undergoing a rapid transformation in how it generates and distributes energy. With solar PV and wind power ramping up quickly, grid operators are increasingly reliant on energy storage systems to manage variability and avoid curtailment of renewable energy during periods of oversupply.

According to Italia Solare's assessment, as of September 30, 2025, Italy had 848,814 connected electrochemical storage systems, representing a total energy capacity of 17,416 MWh and ...

Regarding large-scale energy storage, new installations will also decline in 2025, as some projects auctioned in 2024 have already been connected to the grid. New capacity additions in ...

For Italy, these latest approvals are more than just infrastructure projects--they're foundational pieces in a cleaner, more resilient, and smarter energy system. And for Europe at large, ...

Italy's environment and energy ministry has approved six utility-scale battery storage projects in Lazio, Campania, Basilicata and Puglia.

Latest on Italian energy storage projects

Energy storage systems are a strategic asset to guarantee security and flexibility to the national electricity grid and accelerate Italy's energy transition. And they are essential to reach Italy's target of ...

The Italian energy market is marking another milestone with the addition of two battery energy storage system (BESS) projects in Sicily. With a combined capacity of 162 MW, these ...

Italy has given the green light to two major energy storage projects, each with a capacity of 162 megawatts.

The Italian government has authorized eight BESS projects that will strengthen the stability of the power grid. Companies such as Edison Next and GreenGo stand out in this initiative. ...

The Italian utility-scale battery storage market is one of the most exciting in Europe. Just under 4GWh is completed and/or operational, with a further 2GWh+ under construction. The demand ...

Italy's Ministry of the Environment and Energy Security (Mase) has issued final approvals for five new battery energy storage system (BESS) projects, paving the way for 361 MW of new ...
