-----

The investment promotion team in Liangjiang is wholly dedicated to the solid-state battery layout, while simultaneously nurturing and fostering the potential growth of unicorn companies within ...

The release of an action plan aims to position Liangjiang as a leader in green and low-carbon city development. This year, Liangjiang has accelerated the development of its new energy ...

This project represents the pinnacle of domestic 700 MW-class gas-steam combined cycle power generation technology. It features high automation, rapid start-up and shutdown capabilities, and ...

According to the agreement between EDL and EDL-Gen Solar Power Limited, solar power electricity generation with 100 megawatts are set for 2 phases: EDL-Gen Solar Power Company Limited is a ...

This partnership targets the entire industrial ecosystem, spanning R& D, incubation, testing, and production in sectors such as high-end power equipment and energy storage solutions.

On the factory's rooftops, solar panels provide over 30 percent of the electricity supply. With distributed stations set to reach 173 megawatts, annual output is expected to hit 170 million ...

The core consists of three parts - photovoltaic power generation, energy storage batteries, and charging piles. These three parts form a microgrid, using photovoltaic power ...

The project aims to integrate technological, financial, and market strengths to create a leading power system industrial base and a high-quality, green, low-carbon industrial park.

Liangjiang New Area in Southwest China's Chongqing municipality released a specialized policy to support the development of new energy storage in terms of peak shaving, exemplary applications, ...

An example of the plant's green manufacturing commitment is its solar power generation initiative. In 2024,

# Liangjiang Solar Power Generation

the plant installed a 33-megawatt distributed photovoltaic system and generated 25.53 million ...
