-----

SBM Offshore will exit Equatorial Guinea after divesting its stake in FPSO Aseng to state-owned GEPetrol, marking a shift towards African energy sovereignty amid global transition pressures.

H.E. Emmerson Mnangagwa, President of Zimbabwe has commended Equatorial Guinea for its success in achieving energy self-sufficiency for its capital city, Malabo, with the country ...

This project holds not only energy significance but also broad economic potential. It is expected that the pipeline's construction will attract substantial investment to the region, create ...

Summary: The Malabo Wind, Solar and Energy Storage Project represents a groundbreaking initiative to integrate renewable energy sources with advanced storage solutions. This article explores its ...

Welcome to Malabo, the new energy storage capital that's rewriting Africa's energy playbook. While Dubai builds skyscrapers, this Equatorial Guinean gem is stacking megawatt-hours like Lego blocks. ...

Energy independence ensures that any changes in the global energy market won't have an adverse effect on the country's economy. When there is greater control over the price of energy, it is much ...

Malabo is looking to exploit the recent favourable International Court of Justice (ICJ) ruling on its maritime territorial dispute with Gabon, which could open up new exploration plays and ...

But with their new 2025 energy storage policy, they're finally tackling the elephant in the room - how to store all that potential solar and wind power. The city currently relies on diesel generators for 78% of ...

The Malabo project isn't just about megawatts - it's a blueprint for Africa's energy independence. By combining solar generation with smart storage, communities gain:
