Which mobile networks are used in Malawi?

Mobile Networks: Given the limited fixed infrastructure, mobile networks carry the bulk of internet traffic in Malawi. The country's two dominant mobile operators - Airtel Malawi (a Bharti Airtel subsidiary) and Telekom Networks Malawi (TNM) - provide nationwide 2G/3G coverage and have invested in 4G LTE to improve data services .

Does Malawi have a telecom project?

Improved Power Supply: While not a telecom project per se, Malawi is investing in improving its electricity generation and grid (such as new solar farms and interconnectors with Mozambique). By mid-2020s, incremental progress on electrification is expected.

How many mobile cellular connections are there in Malawi?

As of early 2025, there were 13.2 million mobile cellular connections active in Malawi, equivalent to about 60.3% of the population . (Many individuals own multiple SIMs, so unique mobile users are fewer.) Over 90% of these connections are on 3G or 4G networks, meaning most subscribers have devices capable of mobile broadband .

How will International Support Help Malawi achieve broadband connectivity?

The presence of international support (World Bank, ITU, regional bodies) will help maintain momentum. For instance, Malawi was one of the beneficiaries of the EU-ITU Africa Broadband Connectivity initiative, receiving support in 2024 for broadband mapping and strategy development .

The former incumbent Malawi Telecommunications Limited (MTL) has decommissioned most of its copper telephone network due to years of theft and maintenance issues, leaving almost all ...

In an ambitious project to improve the quality of its network, TNM announced the successful upgrade of its telecommunications sites nationwide as part of its continued commitment to ...

Following approval from the Malawi Communications Regulatory Authority (MACRA), TNM confirmed that 5G base stations went live in two locations for users to test higher mobile data

Malawi communication network base station construction

With approval from the Malawi Communications Regulatory Authority (MACRA), TNM has successfully deployed 5G base stations in two locations. The two base pilot sites will be in ...

Malawi has launched the Mobile Network Tower Development Project in Mzimba, Nkhata Bay, and Mangochi under the Universal Service Fund (USF), a division of the Malawi ...

Malawi is building its first battery-energy system, a technology that will help protect its grid from cyclones that have battered the southern African nation in recent years.

A base station is an integral component of wireless communication networks, serving as a central point that manages the transmission and reception of signals between cellular networks and mobile devices.

Following approval from the Malawi Communications Regulatory Authority (MACRA), TNM confirmed that 5G base stations went live in two locations for users to test higher mobile data speeds while the ...

Implemented by the Malawi Communications Regulatory Authority (MACRA) through the Universal Service Fund, the project was executed in collaboration with the Ministry of Information and ...

The communication base station backup power supply has a huge demand for energy storage batteries, which is in line with the characteristics of large-scale use of the battery by the ladder,
