In recent years, Inner Mongolia has carried out integrated projects for sand prevention and control as well as wind and photovoltaic power to advance the improvement efforts in Kubuqi Desert.

He said the region will strive to tap the potential of the land underneath solar panels for planting, and the spaces between the panels for animal husbandry, so as to create a "win-win-win" ...

Workers from CHN Energy Inner Mongolia Company dedicated their time and effort to transform the desolate landscape into a remarkable "blue ocean" of photovoltaic panels. After more ...

The 3-million-kilowatt photovoltaic power station project in the Ordos coal mining subsidence area of Inner Mongolia, constructed by the CHN Energy Investment ...

In Chaideng village in Ordos city, Inner Mongolia autonomous region, 3.46 million blue solar panels stretch across the desert, covering 30 square kilometers, transforming the endless ...

Three best locations for the solar panel installation were identified by multi-criteria AHP analysis using mean potential insolation, mean cloudiness for corresponding months, ...

An aerial drone photo taken on June 7, 2025 shows a photovoltaic project in Kubuqi Desert in north China's Inner Mongolia Autonomous Region.

Once defined by arid wastelands and ecological degradation, the Kubuqi and Ulan Buh deserts in Inner Mongolia are now home to vast expanses of solar panels -- a transformation that's ...

Inner Mongolia hosts China's largest concentration of utility-scale PV plants, including the Great Solar Wall, a massive cluster of PV projects in the Kubuqi Desert. The site is expected to...

Moving photovoltaic panels in Inner Mongolia

An aerial drone photo taken on Sept. 2, 2025 shows workers installing photovoltaic panels at a new energy base in Kubuqi Desert, north China's Inner Mongolia Autonomous Region.
