Our Venlo-style greenhouses are engineered with advanced structural systems and climate control technologies, making them ideal for regions with high temperatures and intense UV exposure like ...

Unlike all other solar technologies, the project encloses large curved mirrors inside a greenhouse, protecting the solar collectors from high winds, sand and dust common in desert oilfields.

Muscat: One of the world's largest solar steam plants is being built in Oman, and it's about to complete phase 1, according to GlassPoint, the developers.

GDS has been the pioneer in the design, and installation of high-grade quality greenhouses across various production farms across the country.

Following the completion of the greenhouse construction, the research teams will prepare for the third stage of the project which will involve conducting training workshops targeting farmers,...

Replacing the glass panels on greenhouse roofs, Heliene's GiPV modules allow greenhouses to run on 100% renewable energy which dramatically reduces energy bills - up to 40-60% savings according ...

Most recently, GlassPoint and Occidental of Oman announced a signed Memorandum of Understanding (MoU) that could lead to a large solar thermal energy plant, exceeding two gigawatts, ...

The greenhouse enables major cost and performance advantages compared to exposed solar designs, from reducing overall material usage to automated washing operations. GlassPoint's ...

Summary: Oman's photovoltaic glass manufacturers are emerging as key players in the global solar energy sector. This article explores their growing capabilities, technological advantages, and role in ...
