Power Datasets related to electricity generation, distribution, consumption and trade

Myanmar's power sector has been severely affected by the ongoing political turmoil. The power sector has been spiralling downward since 2021 with prolonged electricity blackouts throughout the country. ...

Unlike other energy commodities such as coal, oil and natural gas, electricity trade between countries is relatively limited as it is more technically complex and requires a direct cross-border interconnection.

Myanmar's Ministry of Electric Power has ended the rotating power rationing system following increased generation, while keeping household electricity tariffs unchanged. Union Minister ...

Power generation expands as nationwide supply stabilizes February 03, 2026 Global New Light of Myanmar 0
This image depicts a segment of the National Grid responsible for power ...

A work coordination meeting on electricity generation and distribution condition within Yangon Region was held at Yangon Region Government Office on 30th January.

Myanmar's power sector, both on-grid and off-grid, requires not only significant investments but also policy reforms for financial viability to maintain, at least, its existing capability of electricity supply.

Nearly four years after the military coup, the electricity supply situation in Myanmar has deteriorated to unprecedented levels. Beginning early January 2025, the military junta has further ...
