Where is Australia's largest solar module manufacturing plant?

From pv magazine Australia The Sunman Group, founded by solar pioneer and University of New South Wales (UNSW) alumnus Zhengrong Shi, has announced it will develop Australia's largest solar module manufacturing plant in the Hunter Valley after landing AUD 171 million (\$111.92 million) in federal and state government funding.

Will Sunman build a 500MW PV module in NSW?

ARENA has announced up to AU\$151 million in conditional funding for Sunman to establish a 500MW PV module manufacturing facility in NSW.

How many solar projects are paired with batteries in Australia?

Hybrid dominance: 12 of the 20 projects pair utility solar with batteries. This reflects a priority on dispatchable energy and grid services. This paradigm shift in the integration of renewables in Australia continues to take shape outside the government-backed tenders.

What is Neoen Australia doing to accelerate energy transition?

Neoen Australia has launched construction of its third big battery in less than 90 days, helping accelerate the nation's energy transition with 20 GW of utility scale solar, wind, gas, batteries and pumped hydro now either commissioning or under construction across the National Electricity Market.

Discover the latest news on Australia's renewable energy projects for 2025. See how new policies, major investments, and corporate action are driving the clean energy transition.

Discover Australia's largest solar projects in 2025. Explore details on capacity, locations, and developers.

Australia's latest CIS Tender 4 delivered 20 energy projects across 5 states, featuring wind, solar, battery and hybrid installations.

With Solar Sunshot backing, this new facility will bring world-leading solar expertise back to Australian shores, reaffirming Australia's strength in solar innovation and positioning Australian ...

Listed below are the five largest upcoming Solar PV power plants by capacity in Australia, according to

New PV module projects in Australia

GlobalData's power plants database. GlobalData uses proprietary data and analytics to ...

The Sunman Group, founded by solar pioneer and University of New South Wales (UNSW) alumnus Zhengrong Shi, has announced it will develop Australia's largest solar module ...

The facility will reduce solar module costs by approximately 15% by eliminating import expenses, while supporting Australia's position as a global leader in solar research and deployment.

Australia's solar photovoltaic (PV) sector is experiencing significant growth and transformation in 2025, driven by large-scale projects, record-breaking renewable energy generation, ...

The Australian Renewable Energy Agency (ARENA) has awarded conditional funding of up to AUD 151 million (USD 99m/EUR 85.2m) for the construction of a 500-MW solar module factory ...

A surge of new generation and storage capacity reached full output in Australia's main grid in the last quarter with nine projects totalling 1.8 GW of new capacity progressing through ...
