Over the years it has been refined but ownership costs have increased. For example, this year, the annual operating prices have ranged between \$25,000 to \$40,000 to reposition an empty ...

In this study, we developed a mathematical model for an integrated shipping network to investigate the impact of street-turn, depot-direct, using foldable containers, and container ...

More than a fifth of containers are returned empty to their port of origin empty, according to estimates. CCS claims that the SeaFold 40" box could potentially slash the cost of...

By bypassing the need to transport empty containers to a dedicated folding facility and instead folding and bundling them on-site, SKLADX achieves significant cost savings.

The global cost of repositioning containers is enormous and foldable containers have been proposed as one way to address the problem. This study investigates foldable shipping containers ...

If the foldable container is so good, why aren't there hundreds of them in ports around the world? Here we explain some considerations about the implementation of foldable containers in ...

Several thousands of empty containers that were lying in European and American ports have started moving and the global imbalance in container placements is said to be getting better, ...

FLDs can be folded and bundled four high when repositioned, reducing space by 75%, aiding efficient utilization, and lowering the handling burden at ports, meaning they may be more cost-effective than ...

More than 200M empty container movements across the globe provide a waste of more than 200 Mton CO₂, \$25 Billion transport cost and 30 M² depot space. Yes. It's that simple. It's true, all the big ...

Off-site pricing for foldable containers used in ports

In this paper we analyse why previous initiatives for foldable containers failed and discuss the conditions required for successful commercial applications.
