Workers check battery storage pods at a lithium-ion battery storage energy facility in Arizona last year. Ottawa is looking at regulatory changes around these types of facilities.

Whether you're managing a hospital's backup power or integrating wind farms, Ottawa energy storage batteries offer more than just kilowatt-hours - they provide energy independence in an uncertain ...

Workers check battery storage pods at a lithium-ion battery storage energy ...

Grid batteries are shifting peaks, cutting costs, and undercutting gas. A panel in Ottawa explains why batteries are now core grid infrastructure.

By enabling greater use of renewable energy, reducing emissions, stabilizing the grid, and empowering customers, battery storage is poised to help Ontario create a cleaner, more ...

Essentially, a BESS is a massive collective battery -- in this case a lithium ion battery -- to store electricity and distribute it as needed. The proposed property totals about 81 hectares of land.

A proposed energy project in West Ottawa aims to address Ontario's increasing electricity demand by storing excess energy during low-demand periods and delivering it when demand peaks.

The project can store 250 MW of electricity, making it the largest battery energy storage system proposed in the Ottawa area so far. A 250 MW battery can supply enough power at one ...

Gatineau-based energy company Evolgen is looking to build a battery energy storage system (BESS) in the community of South March in a project the company says will help address a ...

Professor Schell was interviewed by Stu Mills of CBC Ottawa to explain the need for battery energy storage systems in the Ontario power grid, and particularly in Ottawa.

Ottawa is selling energy storage batteries

On May 9, 2024, the IESO announced that ten proposed BESS projects were selected, totaling 1,784 megawatts (MW) of energy storage, including two to be located in rural west Ottawa.
