How does hydro generation affect electricity prices in Panama?

Electricity generation relies mainly on hydro production and historically on oil products. Therefore, the market is exposed to years with lower hydro generation that can affect market electricity prices. However, in recent years new technologies developed such as CCGT, coal and renewable plants have been present in Panama.

What is the electricity market like in Panama?

Panama is an electricity market which has grown significantly with a current installed capacity of 3.35GW. Electricity generation relies mainly on hydro production and historically on oil products. Therefore, the market is exposed to years with lower hydro generation that can affect market electricity prices.

Is Panama a good place to buy electricity?

Panama is a market with a significant electricity and peak demand growth, in line with strong GDP growth. We expect current high electricity market prices will attract a growing renewable capacity. Panama is a net exporter to Costa Rica, its only interconnection to date.
