Instead of aligning the solar arrays in rows and columns to form a grid, a Chinese company proposed an innovative design for the 50MW solar farm in Datong, China: that of a giant panda.

Using dark and light solar cells to create a shading effect, the aptly named Panda Green Energy opened a 50-megawatt (MW), CNY350 million solar power plant in Datong, China in June to ...

Welcome to Datong, Shanxi Province -- home to the Panda Power Plant, a 250-acre solar farm shaped just like China's iconic black-and-white bear. This isn't just a whimsical

In China, a solar company is turning heads with its latest design for a solar plant that's in the shape of a panda bear. The panda farm is the first of Panda Green's several bear-shaped farms that will provide ...

The construction of the first solar power station in Datong region is mainly due to the considerable sunshine intensity and radiation index, large land area and strong plasticity, which meet ...

Located in Datong, a city in the province of Shanxi, northern China, the adorable setup consists of two types of solar panels. White thin film photovoltaic (PV) cells make up the bulk of the...

The Panda Power Plant in Datong, China, is one of the largest solar stations in the world, designed in the shape of the iconic panda.

Spotting giant pandas in the PRC just got easier, with the development of a huge 100MW solar park in the shape of the national animal. Panda Green Energy, the firm behind the project, has ...

So in a bid to make solar power more appealing to young people, one Chinese company has ditched the traditional approach of filling fields with uninspiring rows of PV panels, instead ...

Panda Green Energy used a combination of darker monocrystalline silicon (the light-absorbing material in

Panda Solar Power Station Design

most solar cells) and lighter-colored thin film solar cells to design the solar farm in the likeness of ...
