Do solar panels work in PEI?

While the net metering program in PEI works well, pairing your solar panels with a home battery gives you even more control. You can store your own excess energy to use during a power outage, providing true energy independence. As battery prices come down, expect to see this become a very popular addition to solar installations.

How much energy does a solar system produce in PEI?

An average 8 kW solar system in PEI will produce around 9,600 kWh of clean electricity per year. This is equivalent to preventing over 6 metric tons of CO₂ from entering the atmosphere annually. Over the 25-year life of the system, that's a reduction of over 150 metric tons of CO₂. The solar industry is constantly innovating.

Who is Pei electrical insulation?

PEI has been involved with electrical insulation materials for well over a half-century. More > PEI is a service oriented company with a workforce dedicated to providing customer satisfaction through the development of personal relationships with our clients.

How much does electricity cost in PEI?

PEI has some of the highest electricity costs in the country. The standard residential rate is around \$0.1723 per kWh. When you pay a lot for power, you also save a lot when you don't have to buy it from the grid. Every kilowatt-hour your panels produce is a direct saving. Excellent Net Metering Program: PEI has a fantastic net metering program.
