Summary: Discover how containerized energy storage systems are revolutionizing power solutions in Cebu, Philippines. This guide explores technical standards, industry applications, and why EK ...

To date, a total of 65 OSW Service Contracts/WESCs were awarded with approximate potential aggregate capacity of 51 GW spread mainly in north of Luzon, west of Metro Manila, north and south ...

As the Philippines accelerates its renewable energy transition, pumped-storage hydro emerges as the missing link between intermittent generation and consistent supply.

Transmission Electricity generated by power generation facilities is generally transported via a high-voltage transmission system to various distribution utilities or electricity co-operatives. ...

Long overlooked as an energy powerhouse, the country is now making waves with pumped-storage hydroelectric power (PSHP), drawing in billions from some of its wealthiest clans. At ...

The Department of Energy (DOE) of the Philippines endorsed 17 power generation projects to the National Grid Corporation of the Philippines (NGCP) in June 2025, highlighting the ...

At the heart of this energy gold rush is the 797-megawatt Caliraya-Botocan-Kalayaan (CBK) hydropower complex in Laguna. The system, first energised in 1983, is South-east Asia's ...

As the Philippines confronts the climate crisis, activists argue that the urgency that once fueled the construction of coal plants to solve the power crisis of the 1990s must now shift toward ...

With the country's archipelagic geography and frequent power interruptions in remote areas, solar generators housed in modular container units offer portability and ease of deployment. Rising ...
