DTSC held a public webinar on December 17, 2020, to present information on the recently approved regulation to manage waste photovoltaic modules (PV modules), commonly known as ...

The safe and reliable installation of photovoltaic (PV) solar energy systems and their integration with the nation's electric grid requires timely development of the foundational codes and standards governing ...

SEIA is engaged with policymakers at the regulatory and legislative levels in Washington, D.C. and across the country to establish supportive policy frameworks that allow solar to compete in the ...

BackgroundAre Solar Panels Hazardous Waste?Overview of Hazardous Waste RegulationsState Solar Panel End-Of Life PoliciesAdditional ResourcesHazardous waste testing on solar panels in the marketplace has indicated that different varieties of solar panels have different metals present in the semiconductor and solder. Some of these metals, like lead and cadmium, are harmful to human health and the environment at high levels. If these metals are present in high enough quantities in the sol...See more on [epa.gov](https://www.epa.gov)SEIAFederal, State & Regulatory Policy - SEIA
SEIA is engaged with policymakers at the regulatory and legislative levels in Washington, D.C. and across the country to establish supportive policy frameworks that allow solar to compete in the ...

The California Public Utilities Commission (CPUC) presents the California Solar Consumer Protection Guide. The CPUC recommends that solar providers give out this guide during their first contact with ...

Residential Solar Retail Sales Now Regulated By TDLR AUSTIN - Starting September 1, 2025, sales contracts for residential solar energy panels are prohibited from making misleading ...

This page describes the patchwork of federal, state, and local policies and regulations pertaining to renewable energy systems that impact project development.

Photovoltaic panel regulation public account release

Department of Energy

Solar panels sold in the United States need to comply with various standards and regulations, including requirements that cover labeling, documentation, and testing.

EPA is planning to propose new rules to improve the management and recycling of end-of-life solar panels and lithium batteries.

When solar panels, which typically have a 25-30 year lifespan, reach the end of their lives and become waste, they must be managed safely. Learn about this renewable energy waste, ...
