CO2 EMISSION PREVENTED (EST.)

Thirty six solar panels at Shangri La produce 300 watts of electricity. When the sun shines the panels produce 40% of the electricity required to run the orientation center buildings. Energy is also ...

Do you want to estimate the solar electricity production of your solar panels before investing in a photovoltaic system? PVGIS provides you with a detailed and precise simulation of your solar yield, ...

The project entails the construction of a photovoltaic park and its transmission line that will be located in the Ibagué and Piedras areas of the department of Tolima, Colombia.

We strive to adopt environmentally-friendly practices in every area of our business. A pillar of our sustainability initiative is the Solar Water Heating System with 938 sq.m2 of solar panels installed on ...

Located in Gezan Township, Shangri-La City, Diqing Tibetan Autonomous Prefecture, the project has a planned capacity of 100MW and covers an area of nearly 170 hectares.

Atlas launches its first Colombian solar plant, Shangri-La, in Tolima. The 201 MWp project boosts clean power supply and supports regional workforce growth.

Shangri-La demonstrates that a renewable energy project can generate real impact today through jobs, community participation, and a concrete contribution to Colombia's energy system.

Atlas Renewable Energy, a leading international provider of renewable energy solutions, officially inaugurated the Shangri-La solar project, located in Ibagué, Tolima. It marks the start of ...

The structures in the natural areas--the nature discovery lab and pavilion, outdoor classrooms, bird blind, and

Photovoltaic panels installed in Shangri-La

boat house--were designed for minimal impact, floating above the land on helical pier ...
