Solar energy will be a game-changer in China's rural regions, offering a reliable and affordable answer to local energy demands while facilitating the green energy transition ...

Publications U.S. Solar Photovoltaic System and Energy Storage Cost Benchmarks, With Minimum Sustainable Price Analysis: Q1 2023, NLR Technical Report (2023) U.S. Solar Photovoltaic ...

Energy poverty remains a critical global challenge demanding urgent solutions. This study investigates the alleviation effects of rural rooftop photovoltaic potential on energy poverty in China from 2010 to ...

These programs are economically feasible because the costs of generating renewable energy have declined precipitously over the past decade; between 2010 and 2019, solar photovoltaic ...

Through PPAP, the government provides monetary and material assistance for the installation of PV systems, which then enables poor households to earn an income by selling ...

The results show that the PV poverty alleviation policy leads to increases of 3.2% in GDP and 5.3% in GDP per capita, respectively, in targeted poverty counties. These findings are robust across multiple ...

The PV poverty alleviation effect is stronger in poorer regions, particularly in Eastern China. Our results are robust to alternative specifications and variable definitions.

Here, we present a comprehensive assessment of the emission-reducing and income-increasing effects of the PVPA policy using estimated carbon emission factors and a staggered ...

Since 2014, Chinese energy regulators have announced an ambitious plan to help alleviate rural poverty by deploying distributed solar photovoltaic systems in poor areas. Anhui was chosen as...

Since 2013, China has implemented a large-scale initiative to systematically deploy solar photovoltaic (PV) projects to alleviate poverty in rural areas.
